

## CSCI-205 Programming Integrated Project

### Project Proposal

Project Proposal	
<b>Team Name:</b>	Team Wiz Bang
<b>Project Name:</b>	Small games
<b>Members:</b>	Cj Van Hovel, Olivia logue, Hunter Way
<b>General description/purpose/function:</b>	To create a simple application that has a couple small and fun games to play
<b>Anticipated language(s)</b> <i>What language(s) do you anticipate using?</i>	Python
<b>Anticipated coding tool</b> <i>What IDE do you think you will use?</i>	Replit
<b>GitHub</b> <i>How will you integrate your language and tool with GitHub? .</i>	They should hopefully sync so then everyone can stay up to date.
<b>Anticipated technical obstacles</b> <i>What issues do you anticipate with technical resources? For example - if you are doing a web site, do you have access to web hosting,</i>	Figuring out how to have multiple games in the same application & figuring out how to code each game
<b>Anticipated team obstacles</b> <i>What issues do you anticipate with team collaboration? Abilities, new concepts, resources, etc.</i>	Staying up to date with each other and it's a learning situation for all of us.
<b>Team members' schedules</b> <i>Any general scheduling issues to keep in mind</i>	Cj - has work from 8-5 when not in school Olivia - has work on friday nights and saturdays
