CSCI-205 Project Class
Weekly Update Template

Date:	4/21/23
Team Name:	Whiz Bang
Members:	- CJ - Hunter - Olivia
Tasks worked on the past week:	- Turning RPS code into GUI program: buttons, labels, commands - Have a basic Gui Number game, just adding validation, restart, and quit buttons. Also basic GUIs for the closing screen and how to call it from other games. - Made initial layout for Tic-Tac-Toe game
Issues you ran into:	- Getting the button commands to change label results - Multiple compatibility errors between tutorial and initial code - Validating data that is received from the GUIs and how to call the quit screen
Lessons learned:	- How to make button commands and other GUI widgets - Making the Tic-Tac-Toe grid of buttons
Tentative plans for next week:	- Adding validation and trying to connect all of the different programs - See how to add images and make things look nicer

Include a screen shot of your Team's GitHub Project Board with changes you have made since last week:
